NEW DESIGN IN DENTISTRY

GoTrade Direct proudly introduces you to the latest offering from Chiradent, the new **Vizio** dental unit.

Available for the very first time in the UK and exclusively through GoTrade Direct, **Vizio** provides a new concept in dental design.

Manufactured by Chiradent, building on their 40 years experience of dental engineering, **Vizio** brings us the ultimate in design for the ergonomics of the dentist and the patient.

This unit is completely different. The unit comes in a basic version equipped with an instrument table on a swivel arm, pre-installed for 5 instruments. Then you simply add all the options that you need to build your own personal chair ...and if you need to upgrade in the future, you just add options using your basic chair.

So you don't have to purchase a completely new unit. Clever!

Options: Pantographic arm, negatoscope, suction system and hoses. Spittoon block with ceramic bowl, saliva ejector and halogen lamp on pantographic arm can be enhanced by rotary spittoon block and assistant arm with surgical suction unit.

GoTrade Direct Western House, Dawlish Business Park, Dawlish, Devon, EX7 0NH
